

Create Your Own Buildings!

Inspired by Niamh O'Malley's [exhibition](#) with interest in spaces, and architectural design, this Space to Create! resource gives you the opportunity to explore some of the artist's themes.

Think about ideas of landscape, and buildings and how they are a part of our everyday lives. Create your own city or landscape. Think about how you move around and use spaces whether it be in your house or outdoors.

You can use simple household items such as a white paper A4, (colour paper is optional), a pencil, felt tips (optional)

You can start small, and add to the buildings and landscape you create such as people, cars, green grass etc, Think about the environment that is around you.

If you would like to find out more about the Niamh O'Malley's work please click [here](#).
