

Plaster Masterpiece

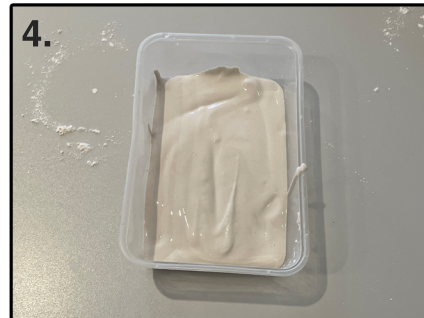

1.
You will need: a plastic container, measuring jug or cup, mixing bowl, stirrer, plaster, water and objects (eg. stones, shells, old toys, scrap material, junk)

2.
Add equal amounts of plaster and water together in to a mixing bowl.

3.
Stir together until you get a smooth texture add more water if needed. Your mixture doesn't want to be too runny.

4.
Pour the plaster mixture in to a plastic container, so thats its about 2cm thick.

We have you used a small take away container.

5.
Collect your objects.

6.
Arrange your objects in your plaster, leave for about 20 minutes to set. You can now pop it out of the container and leave it to dry fully. Once dry you can leave it as it is or you might like to paint it.

Congratulations.....
your Plaster Masterpiece is now ready to put on display.
