

Step 1: create 2 pinch pot bowls, each about the size of your hand.

Step 2: Score around the rim and apply slip, then join the two bowls together.

Step 3: gently roll the hollow ball on the table until it makes a balloon shape.

Step 4: Get another bit of clay and roll into ball. Attach this as a neck to the balloon shape. Don't forget to score and slip!

Step 5: blend the clay downwards from the neck to secure in place.

Step 6: Create the shape of the head and beak. Use pictures to help.

Step 7: Attach the head and beak to the neck using the same method as steps 4&5.

Step 8: Smooth the joins to secure in place.

Step 9: Fill in any places to bulk out the body. Make sure there are no cracks.

Step 10: Using the clay tools, draw on the face features on the head and beak.

Now you have your Seagull to put your design on! Use the Terracotta clay for a different colour or the clay tools for pattern and texture! Or, once dry you can paint the Seagull!

Remember to use the score and slip method if you are using Terracotta clay!

If you make a mistake with the tools, you can just rub it out with your finger!
